MAAZ ALI

AI Engineer | Agentic AI | AI Automation | LLM Applications

maazalisshahid@gmail.com | linkedin.com/in/maazzalii | github.com/MaazzAlii | Rawalpindi, Pakistan

SUMMARY

AI Engineer with 1+ year of hands-on experience and 3 industry internships, specializing in Agentic AI, AI Automation, LLM applications, and production AI systems. Experienced in building commercial client solutions and end-to-end AI platforms using LangGraph, LangChain, n8n, FastAPI, RAG, vector databases, and modern LLM APIs. Delivered enterprise automation, voice AI, intelligent recommendation, and full-stack systems with real-world deployment, API integrations, and scalable backend architectures.

TECHNICAL SKILLS

AI / LLM Engineering: Agentic AI, LangGraph, LangChain, Retrieval-Augmented Generation (RAG), LLM Orchestration, Prompt Engineering, Hugging Face, QLoRA, PEFT, ChromaDB, Qdrant, Mistral AI, OpenAI, Google Gemini, DeepSeek
AI Automation: n8n, AI Workflow Automation, API Integrations, Webhooks, Workflow Orchestration, Human-in-the-Loop, GoHighLevel (GHL), Event-Driven Automation
Backend / APIs: Python, FastAPI, REST APIs, SQLAlchemy, PostgreSQL, Redis, JWT Authentication, Docker, Streamlit
Frontend / Full-Stack: React, Next.js, JavaScript, TypeScript, Tailwind CSS, Git, GitHub, VS Code
Cloud / DevOps: Docker, VPS Deployment, GitHub Actions, CI/CD, Google Workspace APIs, Google Docs API

PROJECTS

BARQ SENSE — Proactive Geospatial Intelligence Platform

Commercial Client Project • Python • FastAPI • React • PostgreSQL • Docker

- Delivered an AED 10,000 commercial AI platform integrating live Sentinel-2 satellite data, geospatial intelligence, and autonomous Agentic AI decision loops for proactive business intelligence
- Engineered spatial-temporal anomaly detection and automated geo-targeted campaign triggers using FastAPI, React, PostgreSQL, external APIs, and Docker-based deployment

Enterprise AI Voice Agent

Client Project — DevMark • Python • FastAPI • LangGraph • Deepgram • Mistral AI • Qdrant

- Built an enterprise conversational voice agent using LangGraph state machines, real-time audio streaming, RAG, and dynamic function routing for intelligent customer interactions
- Integrated Deepgram, Mistral AI, Qdrant, and PostgreSQL to enable real-time voice processing, knowledge retrieval, database queries, and tool-driven conversations

Enterprise n8n Workflow Automation Suite

Commercial Client Project • n8n • HMAC-SHA256 • Webhooks • Google Sheets API • Slack API

- Engineered production n8n automation workflows with cryptographically secured webhooks, multi-branch routing, Google Sheets integrations, Slack notifications, and automated executive reporting
- Deployed self-hosted n8n workflows on VPS infrastructure, implementing HMAC signature verification, scheduled automation, API integrations, and automated weekly AI-generated business digests

GB Tourism — AI-Assisted Recommendation & Booking Platform

Final Year Project • Python • FastAPI • React • scikit-learn • SQLite • Docker

- Developed a full-stack AI tourism platform combining personalized content-based and collaborative recommendation systems with intelligent itinerary generation
- Built hotel booking and travel-planning workflows using FastAPI and React, with Dockerized deployment and machine learning models for personalized recommendations

EDUCATION

BS Computer Science Expected Graduation: January 2027
National University of Modern Languages (NUML), Islamabad

CERTIFICATIONS & ACHIEVEMENTS

- **Microsoft Certified: Azure AI Fundamentals (AI-900)** — Microsoft
- **Build Intelligent Agents Using DeepSeek & n8n** — Coursera
- **AI For Everyone** — DeepLearning.AI (Andrew Ng)
- **Python Essentials 1** — Cisco Networking Academy
- **Published 2 Android Applications** on Google Play Store (Prayer Times / Azan / Adhkar and GPA & CGPA Calculator)
