

MAAZ ALI

AI Engineer | LLM Applications Developer | Agentic AI Systems

✉ maazalishahid@gmail.com |  linkedin.com/in/maazzalii |  github.com/MaazzAlii | 📍 Rawalpindi, Pakistan

SUMMARY

Final-year BS Computer Science student specializing in agentic AI systems and LLM-powered applications. Built and deployed AI projects including multi-agent LangGraph pipelines, Vision RAG systems, a Chrome extension used across 4 AI platforms, and 2 published Android apps on Google Play Store. Experienced with Mistral AI, ChromaDB, FastAPI, Streamlit, and full-stack AI integrations.

TECHNICAL SKILLS

AI / LLMs: LangGraph, Agentic RAG, LLM Orchestration, ChromaDB, Mistral AI, Ollama, Prompt Engineering, Semantic Search, Vector Databases, Vision LLMs, Multi-Agent Systems

Backend / APIs: Python, FastAPI, REST APIs, JWT Authentication, Streamlit, SQLAlchemy, Node.js, Express.js

Frontend / Tools: JavaScript, ReactJS, Chrome Extension APIs, Flutter, Git, GitHub, VS Code

Databases / Cloud: MongoDB Atlas, SQLite, Vector Databases, Cloud APIs

PROJECTS

LangGraph Agentic Vision RAG System

Python • LangGraph • ChromaDB • Mistral AI • Ollama

- Built a LangGraph-based agentic Vision RAG system for semantic retrieval across scanned, handwritten, and complex PDFs using ChromaDB, Mistral AI, and local Ollama inference
- Implemented Vision LLM pipelines for OCR-aware chunking and vector embeddings, significantly improving automated document processing workflows

Agentic Document Comparison System

Python • LangGraph • ChromaDB • Streamlit

- Built an autonomous document comparison system using LangGraph's ReAct framework with dynamic tool selection across multiple ChromaDB collections
- Implemented live reasoning visualization and multi-step document analysis workflows, enabling real-time agent decision transparency

Multi-Agent Content Pipeline

LangGraph • Mistral AI • Streamlit

- Developed a 3-agent AI workflow (Researcher, Writer, Reviewer) coordinated through a dynamic LangGraph state machine, automating end-to-end content generation
- Designed modular orchestration pipelines supporting iterative review cycles and coordinated multi-agent workflows

AI Context Saver — Chrome Extension

JavaScript • Chrome Extension APIs • Mistral AI

- Built a Chrome extension preserving AI chat history across ChatGPT, Claude, Gemini, and Copilot with intelligent DOM extraction and virtualized chat collection
- Integrated Mistral AI summarization achieving ~90% context compression, dramatically reducing token usage on re-engagement

AI Voice Chatbot

Python • Streamlit • Mistral AI • Web Speech API

- Built a real-time AI voice assistant with continuous listen → think → speak conversational workflow
- Integrated browser-native speech recognition and neural TTS APIs with automatic microphone resumption for uninterrupted conversation

EDUCATION

BS Computer Science

National University of Modern Languages (NUML), Islamabad

Expected Graduation: January 2027

CERTIFICATIONS & ACHIEVEMENTS

- **Published 2 Android apps** on Google Play Store — Prayer Times / Azan / Adhkar app and GPA & CGPA Calculator
- **Python Essentials 1** — Cisco Networking Academy
- **Artificial Intelligence Training (NAVTTTC)** — Final Exam Completed (Certificate Pending)
- **Microsoft Azure Fundamentals** — Certification In Progress
